## NEW HARDY LILIES

### Sensational New Mid-Century Hybrids (Crosses of *L. Tigrinum* and *L. Umbellatum*) (See color folder sent out separately.)

These lilies mark a new era in variety and culture. From the hundreds of new varieties the following have been selected, not only for their beauty, but also for their great vigor and endurance under adverse conditions. These lilies are hybrids of *L. tigrinum* and *L. umbellatum*. They grow as well, or better, than either the Tiger lilies or the Umbellatums. They are as colorful and spectacular as any lilies grown and are very easy to propagate. One of them, "Enchantment" has been patented and may not be propagated commercially except by special license. A major and sensational advance has been achieved in the production of these hybrids. All of these lilies show bulbils in the axils of the leaves, if the flower or buds are removed early in the season. "Enchantment" will have bulbils even if allowed to flower normally. All of them flower in July. Their blazing colors and their straight stiff stems have made them stand out in their home garden, and their radical departure in form, habit and coloring from anything that has been seen in lilies up to the time these novelties flowered have been noticed by every visitor to their originator's gardens in Oregon. Be the first in your neighborhood to grow these sensational lilies.
